Tests on Ohio molding sands 840
Theory of sand preparation 717
Time studies used in setting rates in a malleable plant 619
Training apprentices 121
Transverse testing of cast iron by use of Amsler wire testing machine 295
Tuyere ratio, Cupola melting rate as affected by 545
Tuyeres, Ideal cupola 549

Vanadium steel practice, Carbon 659
Venting permanent molds for aluminum castings 281

Wage incentives—the group bonus plan in a malleable plant 610
White cast iron by use of carbon monoxide carbon dioxide mixture when applied under pressure, The catalysis of the graphitization of 374
Wisconsin sand resources 878, 898

X-ray examination of aluminum-alloy castings 261
X-ray examination of metals, Bibliography 277

Authors' Index

Adair, R. G., Safety in the foundry 107
Aitken, J., Discussion—Nickel in cast iron 409
Anderson, R. J., X-ray examination of aluminum-alloy castings for internal defects 261

Barrett, W. J., Foundry management and its effect on foundry cost 39
Bessmer, G. R., Hayes, A., and Henderson, E. L., The effects of some modifications of a rapid annealing method on the physical properties of malleable iron 646
Binney, R. L., The temperature determination of non-ferrous alloys 180
Black, R., and Shafer, C. L., Atomized coal system of non-ferrous melting 191
Bolton, J. W., Discussion—The influence of phosphorus on iron .. 467
Bull, R. A., Report of A. F. A. representative on joint committee on investigation of effect of phosphorus and sulphur in steel .. 705

Campbell, H. L., The qualities of commercial core oils 72
Chaffe, J. B., Permanent mold aluminum castings and their field of usefulness 280
Comstock, G. F., Discussion—Heat treatment of cast iron and semi-steel 343
Crane, P. W., Molding sand work at the University of Cincinnati. 829
Crosby, V. A., Discussion—Effect of tuyere ratios on cupola melting rate 549
Crosser, D. H., Discussion—Nickel in cast iron 417
Cummings, J. L., Report of committee on refractories 85

Daniels, S., Aircraft castings in aluminum alloys 213
Day, W. E., Discussion—Nickel in cast iron 424
Dietert, H. W., and Myler, W. M., Continuous iron temperature recording 474
Molding sand control in the foundry 721
Drysdale, G. A., Desulphurization of ferrous metals 557
Ducey, D. F., Making miscellaneous steel castings for navy use .. 686

Eckman, J. R., Jordan, L., and Jominy, W. E., The oxygen content of coke and charcoal cast irons 431

Felton, S. J., Superheating iron in the cupola 538
Flanders, H. E., and Hayes, A., One of the causes of variations in rates of graphitization of white cast iron 634

Fletcher, J. E., Some fundamental relationships in cast iron, wrought and steel manufacture..... 6
de Fleury, R., Some notes on the founding of light alloys..... 235
